Statistical note

In the percentage column presented in the tables, ‘-’ denotes zero and 0 denotes less than 0.5%.

Some percentages may add up to more or less than 100% due to rounding.

Allegation figures presented in the tables refer to allegations recorded in 2008/09 and attached to complaint cases recorded in any time period since 1 April 2005. If a complainant has made a new allegation in 2008/09 relating to a complaint case recorded since 1 April 2005 this will be included in these tables. This approach may differ from that used by police forces to calculate their figures locally.

The figures in this table will not match the figures in the following tables for complainants. This is because people may make complaints in different roles throughout the year. In such cases they will be counted twice in this table but not in the following tables.

Note: the IPCC receives both self-defined ethnicity and visual assessment data (referred to as police-recorded ethnicity) for complainants. To provide the most complete dataset, both methods have been combined. This table presents figures for self-defined ethnicity and, where this is not available, the police-recorded ethnicity has been used.

1. The figures in this table will not match the figures in the following tables for those subject to a complaint. This is because individuals may hold different ranks when subject to more than one complaint throughout the year. In such cases they will be counted twice in this table but not in the following tables.
 2. Figures for police officer ranks include ACPO ranks. ACPO rank officers are counted in this table only.

Note: the IPCC receives both self-defined ethnicity and visual assessment data (referred to as police-recorded ethnicity) for subjects. To provide the most complete dataset, both methods have been combined. This table presents figures for self-defined ethnicity and, where this is not available, the police-recorded ethnicity has been used.
